DETAILED ACTION

Applicants' reply was received March 16, 2006.

- Claims 1-25 and 45-65 are currently pending.
- Applicant is reminded to cancel non-elected claims in subsequent action.

Application is currently pending.

Drawings

The drawings are objected to because:

- Figure 1A, reference numbers 102, 103 and 104 need labels.
- Figure 1B, reference numbers 153, 154 and 155 need labels.

A proposed drawing correction or corrected drawings are required in reply to the Office action to avoid abandonment of the application.

Specification

The disclosure is objected to because of the following informalities:

- In the specification, claims and abstract Applicants seem to use the terms "minimum distance" and "minimum hamming distance" interchangeably. Examiner respectfully requests the language to uniform throughout to avoid confusions. Preferably, "minimum hamming distance" would be better.

Art Unit: 2133

- Throughout the specification Applicants refer to copending applications. The corresponding application numbers and/or patent numbers should be written out in the specification.
- The lengthy specification has not been checked to the extent necessary to determine the presence of all possible minor errors. Applicant's cooperation is requested in correcting any errors of which applicant may become aware in the specification.

Appropriate correction is required.

Claim Objections

Claim 1 is objected to because of the following informalities:

- The phrase, "...minimum distance..." in the claims should be replaced with "...minimum hamming distance..." Applicant is reminded to make this correction throughout the entire application. Examiner may not have pointed out all possible citing.
- It is not clear from the claim from where the "selecting a recipient array" is being made from.

Appropriate correction is required.

Claim 45 is objected to because of the following informalities:

- The phrase, "...minimum distance..." in the claims should be replaced with "...minimum hamming distance..." Applicant is reminded to make this correction throughout the entire application.

Appropriate correction is required.

Claim Rejections - 35 USC § 112

Claim 8 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites relative terminology that renders the claim to be indefinite. For example, the phrase, "...based on a minimal performance impact..." is not exact since performance is relatively rated. Examiner suggests amending the claim or canceling it.

Claim 9 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention. The claim recites relative terminology that renders the claim to be indefinite. For example, the phrase, "...based on a improved performance impact..." is not exact since performance is relatively rated. Examiner suggests amending the claim or canceling it.

Allowable Subject Matter

Claims 1-25 and 45-65 would be in condition for allowance once the minor informalities noted in the "Claim Objections" are rejections under 35 USC 112 are overcome. The following is a statement of reasons for the indication of allowable subject matter:

Independent claim 1 of the present application teaches a method for increasing failure tolerance of a storage system having a plurality of arrays, each array having a plurality of storage units, the method comprising steps of: selecting a recipient array; selecting a donor array from the plurality of arrays when a difference between a minimum hamming distance of the recipient array is greater or equal to 2; selecting a donor storage unit in the donor array; and rebuilding at

Art Unit: 2133

least a portion of lost recipient information from the recipient array on the selected storage unit in the donor array. The prior arts of record do not teach nor fairly suggest the foregoing limitations. Particularly, the prior arts of record do not teach or suggest selecting a donor array from the plurality of arrays when a difference between a minimum hamming distance of the donor array and a minimum hamming distance of the recipient array is greater than or equal to 2. These limitations are not obvious over the prior arts of record and are believed to be novel.

Independent claim 45 recites similar limitations as those found in claim 1 and therefore is allowable as well.

Dependent claims 2-25 and 46-65 depend from independent claims 1 and 45 respectively and inherently include the limitations therein and therefore are allowable as well.
